CLAIMS

We claim:

1.   Apparatus comprising:

an automated transaction machine, including:

an output device, wherein the output device outputs information, whereby a user is enabled to perceive outputs from the output device;

an input device, wherein the input device is operate to receive inputs, whereby a user is enabled to provide inputs to the machine;

a transaction function device, wherein the transaction function device is selectively operative to carry out a transaction function;

a computer, wherein the computer is in operative connection with the output device, the input device and the transaction function device;

software executable in the computer, wherein the software includes a browser, wherein the browser is operative to process HTML documents including instructions therein, and wherein the transaction function device is operative to carry out the transaction function responsive to the browser processing a document including an instruction to operate the transaction function device.

2.   The apparatus according to claim 1 wherein the transaction function device includes a sheet dispenser.

3.   The apparatus according to claim 1 wherein the transaction function device includes a card reader.

4.   The apparatus according to claim 1 wherein the transaction function device includes a printer.

5.   The apparatus according to claim 1 wherein the transaction function device includes a depository.

6.   The apparatus according to claim 1 wherein the transaction function device includes a keyboard.

7.   The apparatus according to claim 1 wherein the software is operative responsive to an instruction to access an HTTP record address, wherein the HTTP record address corresponds to an HTTP record including instructions for operating the transaction function device.
